

Heatmap visualization showing the relationship between Window Start (IGI) and an unlabeled variable. The x-axis represents Window Start (IGI) from 9 to 21, and the y-axis represents an unlabeled variable from 1 to 10. The color scale ranges from dark blue (low values) to yellow (high values). The heatmap shows a clear trend where values increase as the window start increases, with the highest values (yellow) occurring at window starts 18 and 19.
